Search Notes

We have performed a structure search for tetra-amide compound both on Registry file and Casreact but didn't get any good answers when scanned. We have also looked the US Patent Number 4,830,671 on Hcap file to check how the compound is index, it also didn't index as tetra-amide compound. We have included it on the search report FYI, since it has the similar structure to your search request. Thank you.

Voluntary Results Feedback Form

- I am an examiner in Workgroup: Example: 1713
- Relevant prior art **found**, search results used as follows:

- ☐ 102 rejection
- ☐ 103 rejection
- ☐ Cited as being of interest.
- ☐ Helped examiner better understand the invention.
- ☐ Helped examiner better understand the state of the art in their technology.

Types of relevant prior art found:

- ☐ Foreign Patent(s)
- ☐ Non-Patent Literature
(journal articles, conference proceedings, new product announcements etc.)

- Relevant prior art **not found**:

- ☐ Results verified the lack of relevant prior art (helped determine patentability).
- ☐ Results were not useful in determining patentability or understanding the invention.

Subject: structure search for 10/691,255

Please search this structure below

wherein R_a is a branched alkylene group having about 34 carbon atoms and which may include unsaturations and cyclic groups, more specifically a group of the formula $C_{34}H_{62+n}$ wherein n is an integer of 0, 1, 2, 3, 4, 5, 6, 7, 8, 9, or 10; at least some isomers of the tetra-amide product were believed to be of the formula

which appears on page 57 of the specification in serial number 10/691,255.

ABSTRACT OF THE DISCLOSURE

Disclosed is a process for preparing a tetra-amide which comprises carrying out a condensation reaction between a diacid, a monoacid, and a diisocyanate, thereby forming a tetra-amide. Also disclosed is a process for preparing a phase change ink composition which comprises (a) carrying out a condensation reaction between a diacid, a monoacid, and a diisocyanate, thereby forming a tetra-amide; and (b) admixing the tetra-amide thus formed with a colorant, thereby forming a phase change ink.
